Near-Bob Physical Boundary: Exhaustive 3,125-Action Grid Search
Bob [1.8, 1.6, 0.85] vs Eve [1.85, 1.65, 0.85] (7.07 cm Collinear Separation)
Max Achievable $R_s = 0.0000$ bps/Hz
Exhaustive Search across all 3,125 Actions:
• Actions with $R_s = 0.0000$: 100% (3,125 / 3,125)
• Maximum Secrecy Rate: strictly 0.0000 bps/Hz
• Cause: Spatial collinearity ($h_{AE} > h_{AB}$)
